

Prem Gokul Shinde

AI & Machine Learning Engineer | Python Developer

✉ shindeprem187@gmail.com  LinkedIn  Github  Portfolio

Objective

Final-year Computer Engineering student with a strong foundation in Python, Java, SQL, Machine Learning, and Data Analysis. Seeking an entry-level AI/ML, Data Science, or Software Engineer role where I can apply my technical skills to build scalable solutions while continuously learning and contributing to real-world projects.

Education

Bachelor of Engineering in Computer Engineering , <i>Vighnagarata Trust's</i> <i>Shivajirao S. Jondhle - College of Engineering & Technology, Shahpur</i> CGPA-6.74	2022 – 2026 Asangaon, Dist Thane
--	-------------------------------------

Skills

Programming

Python | SQL

Web Development

Flask | JavaScript | HTML | CSS

Libraries & Frameworks

NumPy | pandas | Matplotlib | Seaborn | scikit-learn | TensorFlow

Tools

Power BI | GitHub | Jupyter Notebook

Machine Learning & AI

Machine Learning | NLP | Data Analysis | Model Building

Cloud

AWS (S3, EC2, IAM, Lambda)

Projects

Customer Churn Prediction & Deployment, Tech: Python, Scikit-learn, FastAPI, MLflow, Docker, AWS

Built an end-to-end machine learning model to predict customer churn using classification algorithms and data preprocessing techniques. Deployed the model as a REST API using FastAPI with Docker, MLflow for experiment tracking, and AWS for cloud deployment.

Customer Segmentation using K-Means Clustering, Tech: Python, Scikit-learn, Pandas, Matplotlib, Streamlit

Developed a customer segmentation system using K-Means clustering to group customers based on purchasing behavior.

Performed data preprocessing, feature scaling, exploratory data analysis, and interactive visualization to support business insights.

A.I resume analyzer

Built an Resume analyzer capable allowing users to upload a resume then the app will parse and extract the data from the resume using name entity recognition, it will analyze the resume, and do a SWOT analysis of the candidates strengths and weaknesses and then provide recommendations such as appropriate required courses, tips and techniques for improvement and then the app stores connects to MySQL database and stores information of users which HR can use later for further insights.

HR Analytics Dashboard – Employee Attrition, Tech: Power BI, DAX, Power Query, Excel

Developed an interactive HR Analytics dashboard in Power BI to analyze employee attrition, workforce demographics, salary distribution, and job satisfaction.

Created DAX measures, KPIs, and dynamic reports to identify attrition patterns and support data-driven HR decisions.
